

**EASTERN WASHINGTON
AGRICULTURAL FARMS, FOOD-PROCESSING PLANTS,
AND
PRODUCE-PACKING HOUSES**

Since training began under the Skill Training for Incumbent Worker Program (STIWP) in January 2001, twenty-six (26) customized training courses have been developed by training providers to meet agricultural-sector needs in an efficient, industry-friendly manner.

Certification or Certificate of Completion is awarded to successful trainees. Tuition is paid by the grant -- industry is required to 'match' that fee either by paying trainee wages during the training period or by other means.

The following courses are mobile to come to your town or plant site to meet demand.
